## Lube Oil Membrane Filter

More than 6 million tons of used petroleum products, primarily oils, enter the biosphere each year. Due to their toxicity & carcinogenicity, the rational use of waste lube oils are complicated & limited.

**GDP Filter** presents **Lube Oil Membrane Filter**, to handle waste lube oil. It is indeed an answer for transforming waste lube oil to valuable products. The system removes even micro-sized particulates from waste lube oil in simple single step of filtration.

### Compatible for :

- Waste lube oil
- Black diesel fuel
